

# TRANSPORT SERVICES

## OVERVIEW

---

DESIGN & SOLUTIONS - RELEASE 01

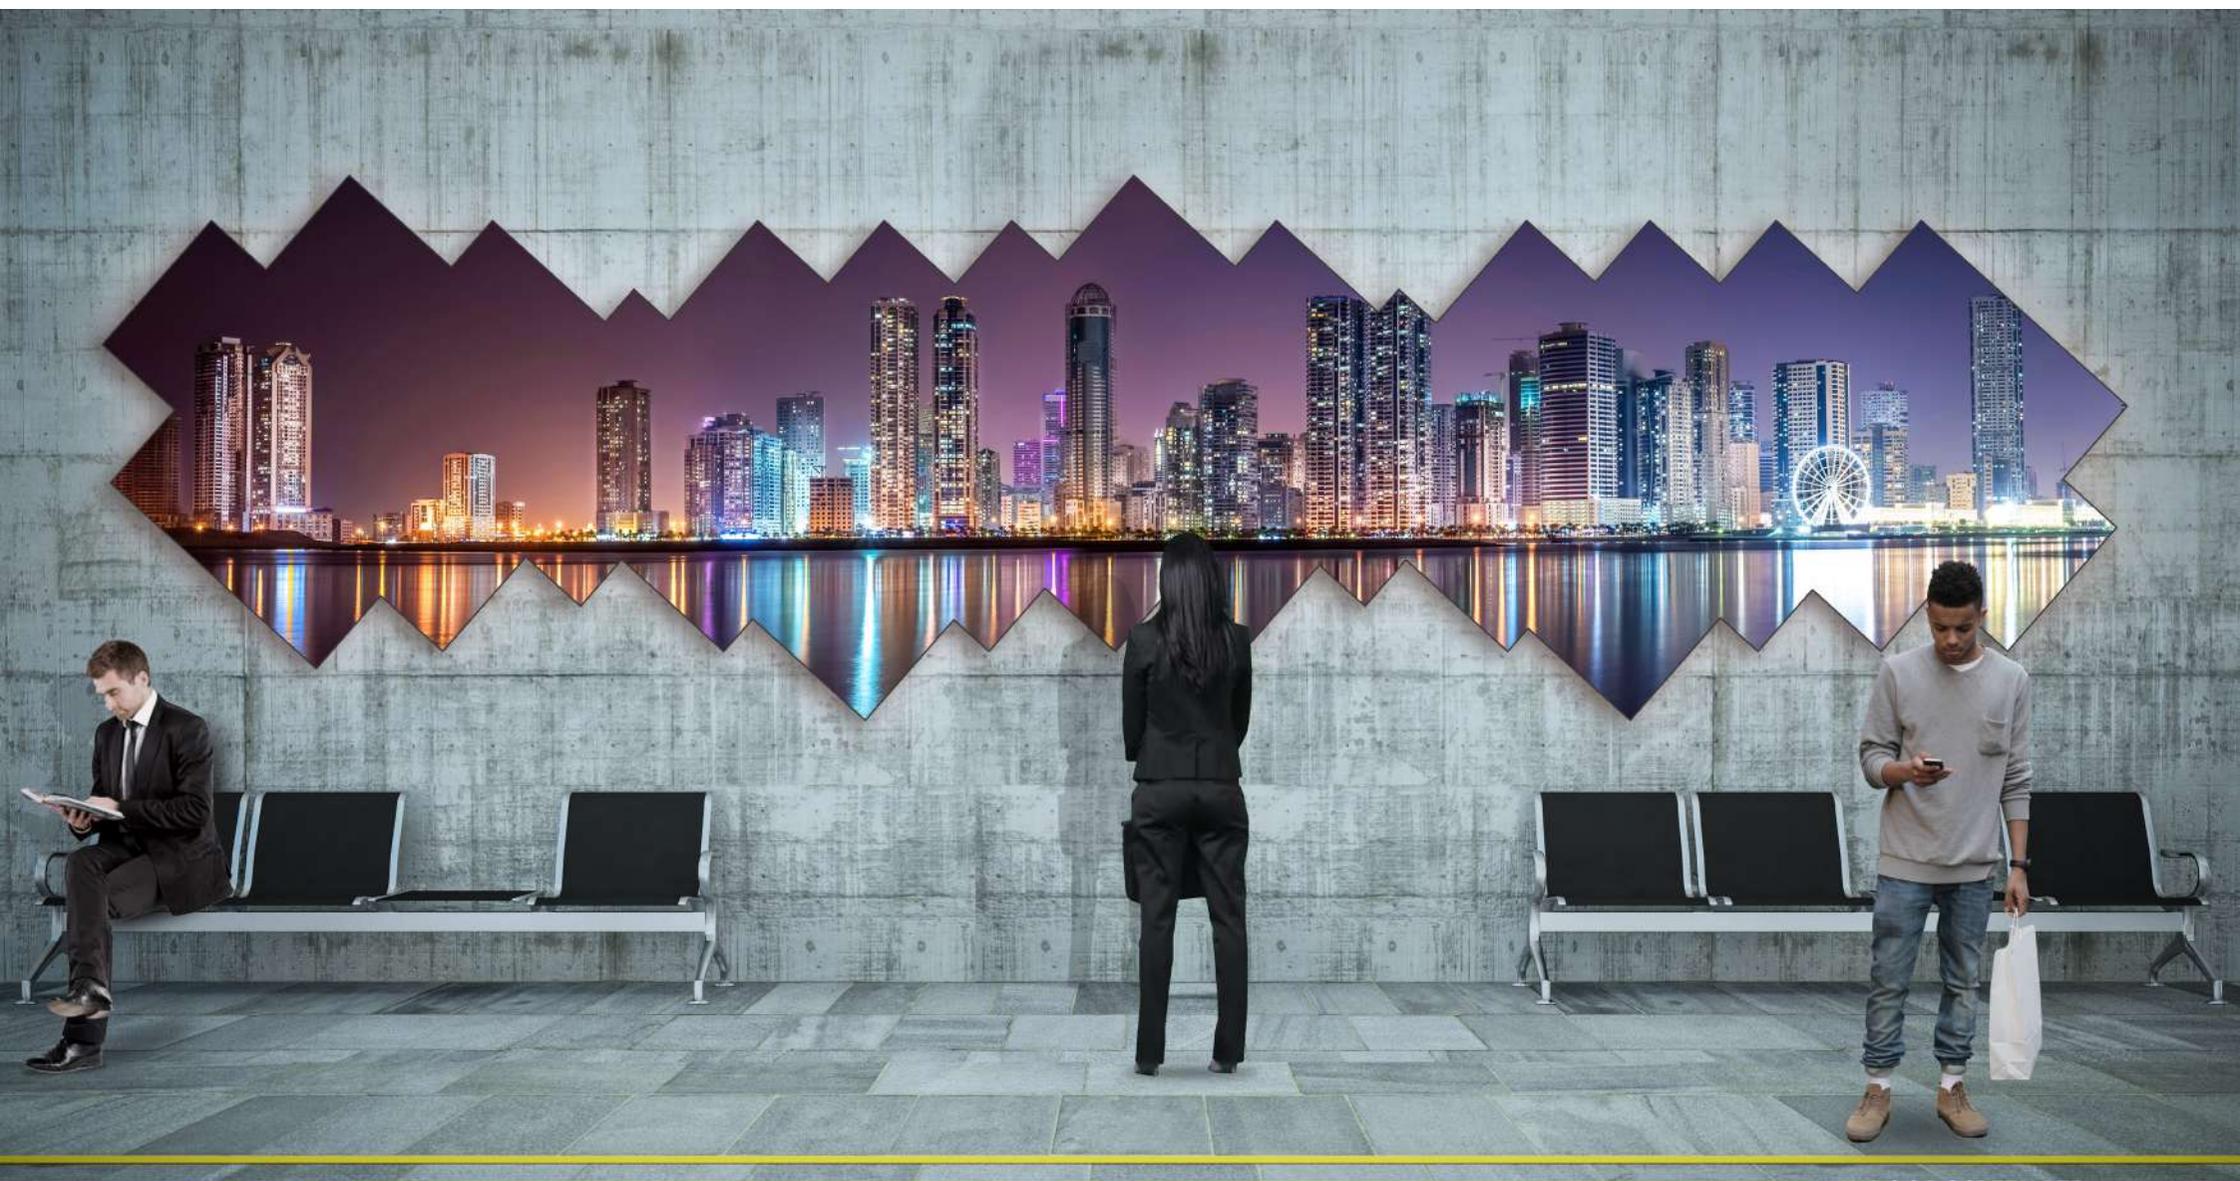

FLEX is at the side of the major airports and transport facilities, assisting them in the creation of the perfect wayfinding and communication strategy that is increasingly oriented towards digital, to maximize the experience of the travelers while enhancing the service, for the benefit of all brands and companies involved.

The result is achieved through two main stages: first, the study and sharing of a project aiming to a highly effective pedestrian flow management. Second, the development of an extremely personalized signage and communication system.

Da sempre FLEX affianca le principali strutture aeroportuali e di trasporto nello sviluppo di una strategia di wayfinding e comunicazione sempre più orientata al digitale che ottimizzi l'esperienza dei viaggiatori e valorizzi il servizio, a beneficio di tutti i brand e le società coinvolte.

Questo percorso passa per due focus principali: lo studio e la condivisione di un progetto mirato a una forte orientabilità dei flussi pedonali, e lo sviluppo di un sistema segnaletico e di comunicazione altamente personalizzato.
